DETAILED ACTION

1. Claims 1-28 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 is indefinite for incomplete since the claim is directed to a method for defining quantitative measures in a computer system, but it is unclear from the claim how the quantitative measures are defined; claim 5 also has the same problem. Further, it is also indefinite as to what the claimed method does if the increment quantity can not be presented precisely within the storage length allocated for the conversion relation; claim 10 has has the same problem.

As per claim 5, it is indefinite as to what the claimed method does if the increment quantity can be presented precisely within the storage length allocated for the conversion relation; Claim 14 also has the same problem.

Claim 18 is indefinite for incomplete since the claim is directed to a method for product planning using a computer system, but it is unclear from the claim how the product planning is carried out.

2. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

3. Claims 1-28 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

Application/Control Number: 10/747,981

Art Unit: 2193

Page 3

claims 1-28 is clearly directed to a method and a computer readable medium having program instruction for performing calculation. In order for such a claimed invention to be statutory, the claimed invention must accomplish a practical application. That is the claimed invention must transform an article or physical object to a different state or thing, or produce a useful, concrete and tangible result. State Street, 149 F.3d at 1373-74, 47 USPQ2d at 1601-02. Also see "Interim Guidelines for Examination of Patent Applications for Patent Subject Matter Eligibility", OG Notices: 22 November 2005. It is clear from claims 1-28 that the claims merely involve in calculations and manipulations of data. The claimed invention does not transform an article or physical object to a different state or thing. The inputs are numbers and the output are also numbers. The result produced by the invention does not has a real world values but merely a numerical value without a practical application recited in the claims to make the result useful, concrete and tangible. Therefore, the claimed invention is directed to non-statutory subject matter as the claims fail to accomplish a practical application. Further, since the claims appears to cover every substantial practical application, it is directed to a preemption of the claimed calculation.

- 4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
- 5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Chuong D. Ngo whose telephone number is (571) 272-3731. The examiner can normally be reached on Tuesday-Friday.

Art Unit: 2193

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Meng-Ai An can be reached on (571) 272-3756. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
